

Week 6 | HTML and CSS 2

Review from last week...

Element

```
<p id="myParagraph">This is some text</p>
```

Tag

```
<p id="myParagraph">This is some text</p>
```

Attribute

```
<p id="myParagraph">This is some text</p>
```

Elements nest inside one another in HTML

```
<body>
```

```
    <p>This is a paragraph tag is nested inside the body tag</p>
```

```
</body>
```

```
<body>
  <div class="lyrics">
    <h1>Shake it off</h1>

    <p>I stay up too late</p>
    <p>Got nothing in my brain</p>
    <p>That's what people say</p>
  </div>
</body>
```

Adding images

```

```

Incorrect code.
Operating station will
explode in twenty seconds.
Evacuate immediately.

A few new things for this week ...

Let's make some tables

```
<table>
  <tr>
    <th>Head 1</th>
    <th>Head 2</th>
  </tr>
  <tr>
    <td>Data 1</td>
    <td>Data 2</td>
  </tr>
  <tr>
    <td>Data 3</td>
    <td>Data 4</td>
  </tr>
</table>
```

Head 1	Head 2
---------------	---------------

Data 1	Data 2
--------	--------

Data 3	Data 4
--------	--------

Good: Inline styles

```
<div class="myDiv" style="color:red;">This text is red.</div>
```

Better:

Style tags in the header / Internal stylesheet

```
<head>
  <style>
    .myClass{
      color: red;
    }
  </style>
</head>
```

Best:

External stylesheet

```
<link rel="stylesheet" href="css/styles.css">
```

BREAK!

In-class exercises
